Summary

Final-year Information Technology student with ~6 months of experience developing web applications using ASP.NET Core, SQL Server, and Docker. Seeking a Fresher Software Engineer position to contribute to building scalable, maintainable, and efficient software systems.

Skills

- **Programming Languages:** C#, JavaScript, SQL.
- **Frameworks:** .NET Framework/Core, ASP.NET Core (MVC, Web API)
- **Databases:** SQL Server (Advanced Performance Tuning, Indexing, Stored Procedures), PostgreSQL.
- **Cloud Platform:** Azure (Deployment & Management)
- **System & Architecture:** Clean Architecture, System Design
- **DevOps & Infrastructure:** Docker
- **CI/CD & Automation:** GitLab, GitHub Action.
- **Monitoring & Testing Tools:** Postman
- **Methodologies:** Agile/Scrum, CI/CD, API Testing
- **AI:** Utilized AI tools (Claude, ChatGPT, Antigravity, Gemini) for code support, debugging, and improving development efficiency

Experiences

Backend Developer Intern

Salink Vietnam (Onsite)

(Apr 2026 - Present)

1. Developed and optimized SQL Server stored procedures and functions to improve query performance and support business operations.
2. Worked with **ADO.NET** to implement data access, execute stored procedures, and handle database transactions in backend systems.
3. Participated in internship projects involving backend development, database design, and query optimization.

Projects

TPS - Learning Management System

Live API: <https://finalproject-gwa6h5c5gedjdufa.japanwest-01.azurewebsites.net>

(Apr 2026 – Present)

TechStack: ASP.NET Core 8 (Web API), ADO.NET, SQL Server, JWT, ASP.NET Core Identity, Docker, GitHub Actions, Azure Web App

1. Developed and maintained RESTful APIs using ASP.NET Core, applying **Modular monolith** design to improve maintainability and scalability.
2. Implemented authentication and authorization using **JWT and ASP.NET Core Identity** with role-based access control (RBAC).
3. Built and maintained **CI/CD** pipelines using GitHub Actions, including automated build, testing, Docker image creation, and deployment to Azure Web App.
4. Containerized the application using Docker, ensuring consistent environments across development and production.

Spa Booking & Management System

Role: Team Lead / Full-Stack Developer

Live Demo: <https://spabookingwebsite-d3bnc9d8f6b4bab9.japanwest-01.azurewebsites.net>

TechStack: ASP.NET Core 8 (MVC, Web API), Entity Framework Core, SQL Server, ASP.NET Core Identity, Docker, Azure

1. Led a team of 3 developers to design and deliver a full-stack spa booking and management system using ASP.NET Core and SQL Server.
2. Analyzed real-world spa business workflows and benchmarked existing industry platforms to define functional requirements and system architecture.
3. Implemented authentication and authorization using ASP.NET Core Identity with role-based access control (RBAC).
4. Built an **audit logging system** to track database changes for monitoring and traceability.
5. Optimized database queries for search and booking operations, improving system performance.
6. Containerized the application using Docker, deployed and managed to Microsoft Azure.

Education

Bachelor of Science in Information Technology - University of Economics and Finance – Ho Chi Minh City

Sept 2022 - Now

Languages

- 1. **English:** Professional working proficiency
- 2. **Japanese:** Beginner
